

MUHAMMAD AIZUDDIN BIN MOHD AMIN

PROFESSIONAL SUMMARY

Junior Software Engineer specializing in real-time engine systems (Unity 6, Unreal, PlayCanvas), C#, and JavaScript, with expertise in network protocols (MQTT, TCP/UDP). Experienced in architecting cross-engine ecosystems and handling VAPT vulnerability remediation for high-availability deployments. Registered Graduate Technologist (MBOT) with Google Cybersecurity certifications, seeking to apply real-time logic and security foundations to full-stack or security engineering roles.

PROFESSIONAL EXPERIENCE

BIG CORRIDOR SDN. BHD (CRAVEFX)

Kuala Lumpur, Wilayah Persekutuan

Junior Interactive Media and Game Developer

July 2024 – Present

- Architected a novel cross-engine ecosystem for the **National Museum of Singapore's Singapore Odyssey** exhibition that orchestrated real-time Unity-to-Unreal communication via MQTT (JSON) and TCP/UDP Blueprints, achieving 100% operational uptime.
- Audited third-party penetration testing reports(VAPT) for the museum's cross-engine deployment, successfully validating false positives and patching verified vulnerabilities to deliver a hardened, exploit-free production build.
- Engineered a high-availability Unity application for the **Kingsmen Not Mere Spectators** exhibition featuring JSON-driven multi-language subtitle synchronization and a persistent logging system to guarantee zero-crash uptime.
- Authored comprehensive system architecture and troubleshooting guides across multiple deployments, establishing a centralized knowledge repository that minimized team debugging downtime.
- Built the core architecture for a confidential high-fidelity Unity AR project, integrating Google MediaPipe for real-time computer vision tracking while optimizing the rendering pipeline for low-latency performance.
- Developed a location-based tour application by integrating GPS telemetry with Unity's video framework to dynamically sync multimedia content with real-time vessel positioning under outdoor environments.
- Served as the primary technical backup during critical deployment phases and team leaves, maintaining high responsiveness to seamlessly absorb vacant workflows and eliminate project delays.

Selected Projects:

- [National Museum Singapore — Singapore Odyssey: A Journey Through Time](#) (Unreal Engine 5)
- [SG60 Heart & Soul Experience — Arrival Wall](#) (Unity 6)
- [Kingsmen — Not Mere Spectators](#) (Unity 6)
- [NHB Kebaya Quest: A Thread Through Tradition](#) (PlayCanvas, JavaScript)

EDESS EDUCATION DEVELOPMENT AND SOLUTIONS SPECIALIST SDN. BHD.

Skudai, Johor

Game Developer

January 2024 – June 2024

- Architected and developed cross-platform software for Web, Android, and iOS using Unity 3D and C#, building interactive systems for educational and enterprise clients.
- Fast-paced development of grant backed projects, able to execute development of 10-20 game design in less than 6 months.
- Co-developed a grant-funded software project with cross-functional engineering and design teams, iterating through technical milestones to successful completion.
- Managed technical documentation and handoffs, maintaining scalable, maintainable code architecture for long-term engineering ownership.

TOP IT INDUSTRIES

Kuala Terengganu, Terengganu

Web Developer (Internship)

2023 – 2024

- Engineered responsive full-stack frontend modules utilizing Vue.js and Quasar Framework to deploy interactive web applications across enterprise desktop and mobile platforms.
- Architected a full-scale Progressive Web Application prototype modeling financial billing workflows for a state water provider to streamline digital subsidy processing.
- Optimized cross-platform layout rendering and client-side data structures to ensure high-performance offline-first Progressive Web Application functionality.

EDUCATION

University of Technology MARA (UiTM), Shah Alam

Selangor

Bachelor of Computer Science (Hons.), Multimedia Computing 2020 – 2024

- CGPA: 3.65 — Dean's List, Semesters 3–7 (2021–2024)
- Relevant coursework: Programming I & II (C++), Java Programming, Object-Oriented Programming, MySQL, Machine Learning, Artificial Intelligence (Python)

University of Technology MARA (UiTM), Dengkil

Selangor

Foundation in Engineering and Computer Science 2019 – 2020

- CGPA: 3.22

RESEARCH EXPERIENCE & PORTFOLIO

Final Year Project: Design and Technology Augmented Reality Interactive Mobile Application

- Designed and engineered a mobile AR application integrating object recognition with interactive 3D models, applying software architecture and system design principles to a STEM education use case.
- Built the application to integrate with the Design and Technology (RBT) textbook, gamifying STEM learning for secondary students.
- Tech stack: Unity, Vuforia

AWARDS & ACHIEVEMENTS

- Gold Medalist, ASiD Innovation and Creativity Day (AICD), 2019
- Dean's List Award, Semesters 3–7, 2021–2024 (UiTM Shah Alam)

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

Vice-Chairman, Persatuan Mahasiswa Anak Terengganu (PERMATA) —Terengganu state-affiliated student welfare committee under Yayasan Terengganu

- Co-led a state-level charity program and campus events, coordinating logistics, volunteers, and stakeholders throughout the final year.
- Supported students from Terengganu studying in UiTM campus all around Malaysia through a year-long peer mentorship and welfare initiatives.

TECHNICAL SKILLS

Programming Languages: C++, C, C#, Java, Python, JavaScript, R, MySQL,

Web & Full-Stack Development: Vue.js, Quasar Framework, HTML, CSS, JavaScript, Progressive Web Apps (PWA), responsive UI/UX, cross-platform architecture, React.js

Networking & Security: TCP/IP, UDP, MQTT, network protocol design, Linux CLI, network security fundamentals, security risk management

Tools & Platforms: Git, Github, Visual Studio Code, Docker, Virtual Machines, Linux, MySQL, Microsoft Office, Microsoft Teams, Claude, Gemini, Nmap, Wireshark.

Certifications: Google Cybersecurity Foundations; Google Cybersecurity: Manage Security Risks; Google Cybersecurity: Tools of the Trade (Linux & SQL); Google Cybersecurity: Networks & Network Security

Professional Registration: Graduate Technologist, Malaysia Board of Technologists (MBOT)

Languages: Malay (Native/Advanced), English (Intermediate)
